Mobile Computing Laboratory 2021 Assignment Report

Tobias Lafer *Technical University of Graz* Graz, Austria

lafer@student.tugraz.at

Abstract—In the *Mobile Computing*-laboratory, at TU Graz, the students learn in a hands-on way how to develop application for mobile-devices. As a final result, the students create an Android-Application for either a pre-defined (for beginners) or self-chosen (for experienced students) task. As the author had no experience with app-development in advance this course, the pre-defined task was chosen.
This document describes and discusses the essential ideas and concepts as well as the final performance of the devloped app.
